REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at *Adstock Field*

in the County of *Bucks*

by *J. E. L. Weston*

Pattern
RAIN GAUGE Diameter of top *5* in.
Height of top above Ground *9* ft.
" " " Sea Level *362* ft.
Time of Observation *9 a.m.*
Nearest Railway Station { Name *Radbury*
Distance *2 1/2* m. Direction *West*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

Kept at The Plantation, Amersham
in the County of Bucks
by George Walker, F.R.M.S. Sec.

Pattern
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 1 ft.
" " " Sea Level 464 ft.
Time of Observation 9 am
Nearest Railway Station { Name Amersham
Distance 1/4 Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Lincdu Hatch, Burnham
in the County of Bucks
by Percy Pickinell

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 172 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Burnham Beeches
Distance 1 1/4 m. Direction South

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

RAINFALL CHART

BY
NEGRETTI AND ZAMBRA,

METEOROLOGICAL INSTRUMENT MAKERS TO HER MAJESTY,

HOLBORN VIADUCT, E.C.; 45, CORNHILL, E.C.; 122, REGENT STREET, W.; & CRYSTAL PALACE, S.E.

Kept by Colonel R. W. Phipps

At The Stone Chalfont Rifle Bnch

Time 9 A.M.

Date 1902

DIRECTIONS.

Top of gauge 12 inches above the ground in open space. Readings to be taken in the morning and recorded for previous day. Melted snow equals one-twelfth its average depth—thus, 12 inches snow=1.0 rain

Mr. Hugh Robert Mill

62 Camden Square

London N.W.

Dear Sir - "re July 1909 rainfall"

I am sorry I omitted to put
in the '1 on July 27th last, as upon
reference to my books I find I have
there 1.02. for that date, also my
remark in margin says "Heaviest rainfall
in 24 hours this year".

Thanking you for your letter

Yours very truly

Christopher Sainty

REGISTER OF RAINFALL IN 1909

Kept at Fouquier Islands, Stou
in the County of Buckinghamshire
by Christopher Lainty M.J. Medd. L.

Pattern
RAIN GAUGE Diameter of top 5" in.
Height of top above Ground 1 ft. —
" " " Sea Level 67 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Widson
Distance 5.5 miles Direction E. 1/4 N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
- 7 FEB 1911

Kept at Iwer
in the County of Bucks 4
by Arthur Chapman

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 3 ft. 1 in.
" " " Sea Level 160 ft. (about)
Time of Observation 9 a.m.
Nearest Railway Station { Name Bowley G.W.R.
Distance 2 m. Direction E.N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Lanley m. Slough
in the County of Bucks 4
by R. A. Major

Pattern Glaisher
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 10 ft.
" " " Sea Level 85 ft.
Time of Observation 9 a.m.
Nearest Railway Station Name Lanley G.W.
Distance as crow flies 990 yds Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
8 JAN 1910

Kept at Oving House
in the County of Bucks
by George White

Pattern Snowdon
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft.
" " " Sea Level 515 ft.
Time of Observation 9 am.
Nearest Railway Station Name Waddesdon Manor
Distance 3 miles Direction SW.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL
10 JAN 1911

Kept at Oving House, Aylesbury
in the County of Buckingham 5
by George White.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 515 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Waddesdon Manor
Distance 3 Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL
28 JAN 1917

IMPORTANT NOTE.—Rain should be measured daily and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at

Gaplow Court

in the County of

Bucks

by

The Lord Desborough

RAIN
GAUGE

Pattern Negretti & Zamboni
Diameter of top 8 in.
Height of top above Ground 1 ft.
" " " Sea Level 217 ft.

Time of Observation 9 a.m.

Nearest Railway Station

Name Gaplow
Distance 1 1/2 m. Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at

Winslow

in the County of

Bucks.

by

J. E. Causley

Pattern
RAIN GAUGE Diameter of top in.
Height of top above Ground one ft.
" " " Sea Level ft.
Time of Observation 10 am
Nearest Railway Station Winslow North
Name 4 miles
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.
